It speaks of a scheme of government in the nature of an incorporated trusteeship - one in which the officer holds the status of trustee and the citizen is both principal and beneficiary. The picture drawn is one of the continuing evolution of the means devised by organized citizenship for making its will effective; for determining what the government shall be, and what the government shall do; for making the qualified voter an efficient instrument through which the will of the people may be expressed; for making officers both responsive and responsible. Its portrayals are cast on a background of citizen right, citizen duty, and citizen responsibility. The closing pages speak of the momentous forces which are now at work in America to make the people as sovereign more efficient in the exercise of control over their government - over the institutions and agents created by them for rendering public service. The view point taken is the present-day concept that government should exist for common welfare; description and critical comment aim to trace the continuing adaptation of our welfare agencies to the service of the people. Much of the material for the first two parts of this volume was originally published in 1898 in an essay entitled *The Growth of Democracy in the United States - the evolution of popular cooperation in government*.
