For a long time. the study of the literature of the inflation voluminous. Even so. inflation is still one of the most confusing issues in the field of macroeconomic research. For a researcher. choose inflation as their research topic. perhaps not the optimal choice. because many talented economists have hard work in this area for a long time. in accordance with the principle of diminishing marginal utility economics. such a study. field. the input-output ratio is certainly not as a new field. However. research for a central bank workers inflation is a matter of their performance of their duties choices. Defenders of the stability of the currency market economy because the central bank. the face of inflation. can never choose to retreat; especially for China emerging economies in transition in terms of controlling inflation related to the economic and social stability and sustainable development. inflation is more concerned about China's current monetary policy issues. in this case. the Chinese central bank workers rose to the challenge. strengthen research on the problem of inflation. This is my main study the problem of inflation. CONTENTS CHAPTER Chinese and foreign inflation Theory section II of the concept and connotation of the first section of inflation abroad overview of the theory of inflation - as a context of socio-economic development of the third quarter of contemporary China's inflation theoretical..
