Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

The difficulty to monitor and predict the effects of global partnerships tends to increase the importance of cultural and psychological variables such as trust and commitment. Therefore the role of attitudes and perceptions is very important. Whatever the agreement and the conjoined management among partner firms, the attitude of the other agents can produce asymmetric affects on these firms and considerably bias their partnership strategy.
